SUMMARY

Full-stack engineer in Ahmedabad. Co-founder of CookOnCall, a live chef-booking marketplace. I also freelance: store maintenance for Kalokea, internal software for MY SOLAR and part-time QA for Shop'n Earn.

SKILLS

Programming TypeScript, JavaScript, PHP, Python, SQL

Web Next.js, React, Tailwind CSS, NestJS, PHP, REST APIs, JWT and OTP login, Redis

Data & Cloud PostgreSQL, Supabase (row-level security), Railway, Cloudflare, Git and GitHub CI, Sentry

Integrations Razorpay, Clouinary, Brevo, WhatsApp automation, Vertex AI prompt design

QA Test planning, defect triage, regression and security checks, data reconciliation

EXPERIENCE

AI/ML Engineer Intern, AlgoVista Analytics

Feb – Mar 2026

- Worked in the automation department on analytical modelling with Python and research modelling tools (one-month internship, certificate issued).

Co-Founder & Full-Stack Engineer, CookOnCall

Mar 2026 – Present

Chef-booking marketplace, Ahmedabad · thecookoncall.com

- Launched a marketplace for customers, chefs and admins on Next.js, NestJS and PostgreSQL, with live Razorpay payments.
- Designed the 15+ table database with row-level security, role-based access and OTP login.
- Handled a live Redis security incident alone: rotated every credential and switched providers with no downtime.

Freelance Full-Stack Developer, Kalokea

Jun 2026 – Present

Women's fashion store, remote · kalokea.com

- Rebuilt a slow WooCommerce store as a custom shop: 20+ routes, a 30-module admin panel, Razorpay and COD checkout, India GST invoicing, and 301 redirects to keep search rankings.
- Reviewed 387 files before handover and fixed 5 high-severity issues, including a payment bug and an XSS hole. Now maintaining the live store.

Freelance Software Developer, MY SOLAR Power Pvt. Ltd.

Oct 2026 – Present

Internal software for the group, remote

- Replaced a browser-only prototype with a multi-company sales and P&L system for a 20-person team: activity entry, invoices, dashboards and printable reports (PHP API, PostgreSQL).
- Enforced four user roles in both the API and the database so staff never see margins or salaries, added an audit log, wrote 1,000+ automated tests and checked figures against the client's own workbooks.

Freelance QA Engineer (part-time), Shop'n Earn, Hemdip Marketing Pvt. Ltd.

Oct 2026 – Present

E-commerce platform with wallets, referral payouts and two Play Store apps, remote

- Wrote the test plan and ran QA across checkout, wallet payments, orders, withdrawals and a 58-screen admin panel. Logged 60 severity-ranked defects with evidence.
- Found why wallet orders were being auto-cancelled and wrote it up for the developers. Audited 372 products and matched live stock to paper registers.

EDUCATION

B.Sc. Computer Science (AI & ML), Indus University, Ahmedabad · CGPA 8.03

2024 – 2027 (expected)

CERTIFICATIONS

Google Cloud skill badge: Prompt Design in Vertex AI, 2026

Smart India Hackathon 2025: internal round participant, Indus University
